DETAILED ACTION

1. In view of the 2/1/00 Petition decision, the 6/25/04 Abandonment of the instant application is rescinded. The 4/29/04 Amendment After Final, which cancels claims 1 and 2 , and adds new claims 3 and 4, is acknowledged and entered. Also, the 11/7/03 final Office action, is vacated and replace with this one.

Applicant's 4/29/04 Amendment is considered by the examiner as the response to the 9/12/02 non-final Office action.

2. In the 9/12/02 Office action, the examiner: a) objected to the specification under 36 U.S.C. 112, first paragraph, as failing to provide an enabling disclosure; b) rejected the claim under 35 U.S.C. 101; and c) rejected said claim under 35 U.S.C. 112, first and second paragraphs.

Applicant admits in the 4/29/04 Amendment that he does not have any data or information (e.g., energy and momentum or a proton or neutron) to provide support for the generation of fission reactions that produces the so-called precious elements. Thus, the claims are not enabled because one of ordinary skill in the art will require undue experimentation to exercise the claimed invention. Also, the admission provides an adequate and sufficient proof that applicant does not possess an operative embodiment for his claimed invention.

Claim Rejections - 35 USC § 112

Art Unit: 3663

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Specification

3. The application is informal in the arrangement of the specification. The specification and claims are in improper form.

4. The specification is objected to under 35 U.S.C. 112, first paragraph, as failing to provide an adequate written description of the invention and as failing to adequately teach how to make and/or use the invention, i.e., failing to provide an enabling disclosure.

The claimed invention is a method of production of precious elements, including gold, platinum and silver from fissions of other elements. However, there is neither an adequate description nor enabling disclosure as to how such could be accomplished using the applicant's invention, The reasons are as set forth in Section 4 of the 9/12/02 Office action, as further clarified in section 2 above.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Art Unit: 3663

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 3 and 4 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. There is no factual evidence to show that the invention is operative.

The reasons are as set forth in section 5 of the 9/12/02 Office action, as further clarified in section 2 above.

6. Claims 3 and 4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The reasons are the same as those set forth in section 6 of the 9/12/02 Office action, as further clarified in section 2 above.

7. Claims 3 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague, indefinite and incomplete and their metes and bounds cannot be determined because they fail to point out what is included or excluded by the claim language. Each of the two claims is an omnibus claim.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
